Order from OTS or SLA \$1.10 63-16977

Trans. of Plasticheskie Massy (USSR) 1960, no. 5,
p. 22-25.

DESCRIPTORS: *Plastics, Manufacturing methods,
Fluid flow, Elasticity, Viscosity, Plasticity.

Establishing the behavior patterns of flow should make
it possible to resolve the fundamental technical
problem: determining the optimum operational regimes,
as well as the design of extrusion and die-casting
equipment. The nature of the flow of plastics when
they are utilized in the manufacture of articles from
them is governed largely by the relationship between
the forces of internal and external friction, together
with the relaxational properties. The principal proper-

It was found possible to successfully utilize hybridiza-
tion of plants by means of grafting to obtain new fruitful
types of plants. Grafting hybridization within a species
and between species formed heterogeneous material,
but its character was different. A graft within a species
yielded offspring combining characteristics of the graft
and the wilding, and even new growth, but grafting be-
tween species—only new growth, which is defined by
